Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Schaer (6,522,930).

Schaer discloses an ablation instrument and method of use (10; see figure 3) with a microporous (permitting tissue irrigation; col. 15:30-34) housing (58) with a handle (36), a disposable (can be thrown away after use (?)) ablation element (50,52), a fluid source (patented claim 1) that delivers cooling fluid (saline – “lubricating” and physiologically compatible; col. 13:60) betwixt the ablation element (50,52) and housing (58) through an inflow lumen (patented claim 1; element 32), inflow port (inherent) and outflow port (68), all for treating cardiac tissue (col. 14 first paragraph).

Art Unit: 3739

Regarding claim 15, see col. 21:63-66.

Aside: see 6,551,302 col. 18:25-27 for establishing equivalence between saline and "lubricating fluid".
